

Screw Cap Accessories

Screw Cap Gaskets

All AIK Screw Caps have gaskets available for use in liquid-tight applications. For the 6" Caps, we offer flat EPDM gaskets. For the 7" Caps, molded gaskets are available in either EPDM or Viton. Because they're molded to fit AIK Screw Caps, these gaskets provide a better seal and they don't fall out of the Cap when the Cap is turned over. For the large 12" Cap, a tube gasket is available in EPDM. Other gasket materials are available upon request.

PART #	ITEM DESCRIPTION
F7047050EM	EPDM Flat Gasket to fit 6" Screw Cap
F7047060E	EPDM Molded Gasket to fit 7" Screw Cap
F7047060V	Viton Molded Gasket to fit 7" Screw Cap
F7060160B	EPDM Tube Gasket to fit 12" Screw Cap

Rotational Mold Inserts

Constructed of aluminum, these mold inserts are used when rotationally molding IBC's so that the AIK Screw Caps fit perfectly on the threads of the container.

PART #	ITEM DESCRIPTION
RM1060	Rotational Mold Insert for 6" HDPE Screw Cap
RM1070	Rotational Mold Insert for 7" HDPE Screw Cap
RM1012	Rotational Mold Insert for 12" HDPE Screw Cap
